SRI M'S MESSAGE

“Great to see the
Swaasthya team
working & walking
together –
Sangacchadwam”

TOGETHER

COMPASSIONATE

COMMITTED

TRANSFORMING LIVES

ONE TEAM. ONE MISSION. COUNTLESS LIVES.

August continued the strong patient flow seen in July, with sustained demand across outpatient, inpatient, and procedural services — **4,200** total patient visits and **1,367** new registrations this month, reflecting growing utilisation of the hospital and increasing reach among the surrounding community.

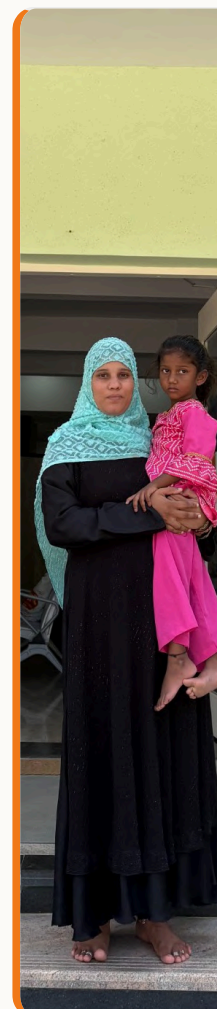

The rise in deliveries and surgeries shows patient activity translating into more inpatient and procedural care: deliveries grew from **9 to 14** (+56%) and surgeries from **18 to 20** (+11%), spanning general surgery, OBG, and orthopaedics — including 8 orthopaedic procedures ranging from trauma fixation to planned surgery. Both are good signs, reflecting stronger utilisation of maternity and mother-and-child services.

The continued high volume of pathology (**1,611** tests) and radiology (**319** procedures) indicates patients are receiving appropriate diagnostic investigations alongside clinical consultations — reflecting growing use of the hospital's diagnostic facilities to support diagnosis and treatment decisions.

Community outreach and referral activity continued to bring new patients to the hospital this month — **5** camps reaching **337** beneficiaries across 5 locations, including a school health screening in Chikulabailu and a general health camp at B.K. Palle. This is particularly reflected in the growth of maternity and surgical cases, showing outreach helping connect patients to the hospital's broader range of services.

Breastfeeding Awareness Session

**CLINICAL HIGHLIGHT****FROM SEVERE DKA TO SAFE RECOVERY**

A 5-year-old girl with Type 1 diabetes mellitus was admitted to the Pediatric ICU with severe diabetic ketoacidosis. Continuous bedside monitoring, timely intervention, and coordinated care from doctors, nurses, and ICU technicians helped her achieve clinical stability and return home safely.

"Seeing our daughter recover and go home safely has given our family great relief." — Patient family

Milestone reached: Swaasthya has now conducted **75 deliveries since inception**, with August alone contributing 14 safe deliveries — a marker of growing maternal care capability and patient trust.

Camps & events *this month*

5
camps held

337
patients reached

5
locations

SL	DATE	CAMP / EVENT	PLACE
1	06 Aug	Breast Feeding Awareness Session	Kumarapuram Anganwadi
2	08 Aug	School Health Monitoring	MPP School, Chikulabailu
3	15 Aug	Neuro Camp	Swaasthya Hospital
4	26 Aug	General Health Camp	B.K Palle
5	28 Aug	GRBS — Diabetes Screening Camp	Mission Compound Ground, Madanapalle

August's outreach spanned five locations and five events — a breastfeeding awareness session at an Anganwadi centre, a school health monitoring drive reaching 182 students in Chikulabailu, specialty and general health camps at Swaasthya Hospital and B.K. Palle, and a diabetes screening drive in Madanapalle — together reaching 337 beneficiaries this month.

School Health & B.K. Palle Camp · *August's featured outreach*

School Health Monitoring · Chikulabailu

SCHOOL HEALTH CAMP 08 August

School Health Monitoring — Chikulabailu

183 students screened **85** dental cavities (46.7%) **8** pallor / anaemia findings

Swaasthya Hospitals conducted a school health screening for 182 students at Mandal Parishath Pradamika Patashala, Chikulabailu, on 8 August, covering height, weight, and BMI assessment, nutritional and general health assessment, vision and colour vision screening, and hearing assessment. BMI assessment showed 74.7% of students within a normal range, while 14.3% were underweight and 11.0% overweight.

Dental cavities were the most prominent finding, identified in 85 students (46.7%), while 8 students (4.4%) showed signs of pallor or anaemia. Vision screening was largely normal, with a few individual findings. Students with dental, nutritional, pallor, or vision concerns are being referred for further evaluation — useful early information on the growth and health status of the community's children.

COMMUNITY CAMP 26 August

Community Health Camp — B.K. Palle

54 screened **17** musculoskeletal cases **54%** had elevated BP

A community health screening camp was conducted at B.K. Palle on 26 August, where 54 beneficiaries received health screening and medical assessment. Participants included 34 males (63%) and 20 females (37%), with an average age of 44 years, most between 41–60 years. Musculoskeletal problems were the leading health concern identified.

Musculoskeletal problems were identified in 17 beneficiaries, highlighting the need for exercise advice, physiotherapy guidance, and appropriate referral. Gastrointestinal complaints, hypertension, diabetes, and dental problems were also identified. Among 48 beneficiaries with complete BP recordings, 26 had elevated readings and 11 markedly elevated — underscoring the value of regular community screening and follow-up for chronic conditions.

75 Safe Deliveries

A maternal & newborn
care milestone

75 New Trees

One sapling for every
newborn family

A NEW LIFE, A NEW TREE

A MILESTONE MADE POSSIBLE TOGETHER

Reaching 75 safe deliveries marks an important chapter in Swaasthya's journey to build trusted maternal and newborn care. At the heart of this milestone has been **Dr. Arshiya Anjum, Obstetrician and Gynecologist**, whose clinical leadership and commitment to mothers and newborns have helped shape this journey. Every safe birth also reflects the dedication of our nursing and support teams, the trust families place in us, and the generosity of donors and well-wishers whose contributions have strengthened our facilities, equipment and care environment.

Dr Adarsh Reddy

"Great to see the Swaasthya team working & walking together — Sangacchadwam."

ONE OF 75 STORIES

CONTINUITY OF CARE — FROM FIRST TRIMESTER TO SAFE DELIVERY

Patient: V. Lahari, 28F, Madanapalle · Mother & Child Ward

Mrs. V. Lahari received antenatal care at Swaasthya from her first trimester through delivery. On 17 August, she welcomed a healthy baby girl. Following routine post-delivery monitoring, both mother and baby were discharged safely.

WHY IT MATTERS: Continuous antenatal care and coordinated maternity support helped mother and baby go home safe and well.

PATIENT FAMILY

"From our first visit, the hospital felt clean, peaceful and positive. The doctors explained everything clearly, and the staff were caring and attentive throughout. We're very happy we chose Swaasthya."

— Harinath, Madanapalle

8

AUGUST SURGICAL
ACTIVITY
**Orthopaedic
surgeries**

Eight orthopaedic surgeries were performed in August, reflecting Swaasthya’s growing capacity to provide **diverse and definitive orthopaedic surgical care** — from trauma management to planned procedures.

Tibial nailing

Forearm fracture fixation

K-wire fixation

Implant removal

Soft-tissue procedures

**TIMELY TRAUMA CARE & SURGICAL
RECOVERY**

FEATURED CASE

From Road Traffic Accident to *Safe Recovery*

PATIENT

**46-year-old
male**

DIAGNOSIS

**Both-bone forearm fracture
following a road traffic accident**

PRESENTATION

A 46-year-old male with no known comorbidities presented to the Emergency Department after a road traffic accident, having received first aid elsewhere. His vital signs were stable, and X-ray confirmed fractures of both bones of the forearm.

TREATMENT & OUTCOME

After counselling the patient and attendants, he underwent Open Reduction and Internal Fixation (ORIF) with plates and screws under brachial plexus block on 04 August 2026. Recovery was uneventful, with antibiotics, analgesia and supportive care, and he was discharged in a stable condition.

Why it matters: This case demonstrates Swaasthya's ability to provide **timely emergency assessment, definitive orthopedic surgery and coordinated postoperative care**, helping a trauma patient return home safely.

PATIENT TESTIMONY

Care that stayed with him

My name is Ramalinga Reddy. I was taking my daughter and going to Madanapalle when an auto came from behind and hit us and I fell down. Then my brother came and then my right arm was broken. He saw me and got me admitted to the hospital. He got me to Swaasthya Hospital. Then again the next day they performed the surgery and then everything was well. The doctors checked and said everything is fine. They looked after me very well and all the nurses were there. They come day and night, they give injections and they put me on glucose drips as well. They took care of everything. I did not have any trouble at all. When I went back there for the second time again they said that I should be fine and that everything is well set and I will be okay.
